Subject: Submission of Manuscript – “*From Molecule to Market: Digitizing the Drug Development Pipeline*”

Dear Editor,

I am pleased to submit our original research manuscript entitled “*From Molecule to Market: Digitizing the Drug Development Pipeline*” for consideration in the *International Journal of Pharmacy & Integrated Health Sciences (IJPIHS)*.

This paper presents an integrative analysis of how digital technologies—particularly artificial intelligence, machine learning, and electronic regulatory systems—are transforming every phase of the pharmaceutical development continuum, from early molecular discovery to post-marketing surveillance. The study synthesizes current evidence to propose a structured framework for end-to-end digitization within pharmaceutical R&D.

The work is original, has not been published previously, and is not under consideration for publication elsewhere. All authors have read and approved the final version of the manuscript. We believe the paper aligns well with IJPIHS’s focus on innovation, digital transformation, and the advancement of pharmaceutical and health sciences.

We respectfully request that you consider this manuscript for peer review in the **Pharmaceutical Sciences / Digital Health and Drug Development** section of your journal.

Thank you for your time and consideration. We look forward to your response.

Sincerely,
Dr. Rehan Haider, Ph.D.
Riggs Pharmaceuticals; Department of Pharmacy,
University of Karachi, Pakistan
